

ACTIVITY 5 - BRAMBUK DISCOVERY

Discover a natural wonderland

The Grampians National Park (Gariwerd) is unique. It has 33 percent of Victoria's plant species (including 26 found nowhere else in the world), 40 percent of the state's different birds ... and the park is home to more kangaroo varieties than anywhere else in Victoria.

In a spirit of adventure, launch into a discovery trail around Brambuk and its surrounding area, exploring Gariwerd's bush foods, transport, medicine and environment.
